

Create a Comic Strip

(You can do this by going to <http://www.bitstrips.com/create/comic/>

or inserting clip art and shapes/call out tabs in Microsoft Word.)

Hey Henry Bessemer! Nice to finally meet you! I heard that you were able to develop a wonderful invention known as the Bessemer Process. Can you please explain to me what it is and why it was such a major technological advance during the Second Industrial Revolution?

Sure! The Bessemer Process is a faster and cheaper way to make steel by blasting hot air through iron. My invention was a major technological advance because since it was more readily available and affordable to railroad companies, more railroads were built throughout the U.S. This caused the West to expand, cities to grow, and communication and transportation was forever changed for the better.
